**NGVI PRODUCES FIRST-EVER COMPREHENSIVE ONLINE BUYERS' GUIDE
EXCLUSIVELY FOR NATURAL GAS VEHICLES**

Las Vegas, NV - Natural Gas Vehicle Institute (NGVi) is pleased to announce the release of the first-ever comprehensive online Buyers' Guide exclusively for Natural Gas Vehicles (NGV). The Guide is designed to be the *one reliable and complete source* of all commercially-available Class 1 through 8 natural gas vehicles, engines and conversion systems. Offered through subscription, it is available exclusively online through NGVi's website, <http://www.ngvi.com/bg>.

"Natural gas is an economically and environmentally smart alternative to gasoline and diesel for fleets. More and more companies are incorporating natural gas into their fleets. NGVi recognizes the importance of giving fleet professionals the resources and tools needed to develop and implement a successful natural gas vehicle deployment strategy. That's why we developed the NGV Buyers' Guide" said Annalloyd Thomason, Vice President and General Manager of NGVi.

The NGV Buyers' Guide is the latest product from NGVi to help fleet professionals to incorporate natural gas vehicles into their operations. The Guide allows the user to search by fuel type, vehicle class, vehicle type, model year and manufacturer including original equipment manufacturers, small volume manufacturers, and engine and chassis manufacturers. Search results yield detailed vehicle specification information and vehicle images. Complete contact information for each manufacturer and natural gas industry partners is also included to help make purchasing decisions easier.

"All this information may be available from each individual manufacturer, however, our Guide cuts down the initial research by making it all available in one central location. We worked as closely as possible with each manufacturer to ensure accuracy," said Thomason. "We will continue to work with them to regularly update the Guide as new vehicles enter the market, keeping the Guide as accurate as possible."

For a limited time, the NGV Buyers' Guide is being offered at a special introductory rate for a 12-month subscription. The NGV Buyers' Guide can be previewed and purchased at <http://www.ngvi.com/bg>.

About NGVi: NGVi is North America's leading provider of education and training programs and technical consulting on natural gas vehicles and fueling technologies. Established in 1989, NGVi has worked with hundreds of companies and government agencies throughout the U.S. and worldwide to help successfully integrate natural gas into their transportation mix. The professional staff each has more than 25 years' experience in technical consulting and training on natural gas vehicles and fueling. Leo Thomason, Executive Director, is known internationally as an expert in natural gas fueling and vehicle technology and has personally successfully trained more than 14,000 students in the United States and worldwide.
