

Press Release

CNGci Obtains Canadian CRN Approval for Alberta

CNG cylinders international (CNGci) would like to announce the receipt of Canadian CRN approval for the province of Alberta (CRN No. R2348.52).

CNGci already holds CRN approvals for the provinces of Ontario (CRN No. R2348.5) and British Columbia (CRN No. R2348.51).

We are pleased to be able to increase our market penetration to include another key Canadian province and look forward to serving our customers even better.

CNGci is currently the leading producer of large diameter Type 3 cylinders in the world, giving us a significant technological advantage in this market segment.

The superior heat dissipation of the aluminum liner allows for significantly more gas and thus more usable DGE in the cylinder under fast-fill conditions, which is an industry game-changer.

July 2017

The largest diameter Type 3 cylinders in the world!
