

CNG cylinders international announces name change to Winkelmann Flowform Technology - Fuel Systems

CNG cylinders international (CNGci) – a leading manufacturer of Type 3 CNG cylinders and fuel systems used in the transportation Industry – announced today that it is changing its name to Winkelmann Flowform Technology - Fuel Systems (WFT-FS). The name change reflects the company's broader commitment to high-pressure gas storage applications relying on large diameter Type 3 cylinders beyond on-board CNG fuel storage applications which had been the core business for CNGci.

In conjunction with the name change a restructuring effort has relocated WFT-FS to Thousand Oaks, California from where it will be coordinating the sales and marketing efforts targeting its customers on the West Coast and Mexico, while its manufacturing operations have been relocated to WFT-FS headquarters in Auburn, Alabama.

WFT-FS is part of the Winkelmann Group; a German company with global manufacturing facilities and provider of flow formed products catering to a wide variety of automotive, industrial, defense and aerospace applications.

Winkelmann Group consists of 4 main divisions comprising 26 individual business units and 13 manufacturing and sales operations in 12 different countries.

WFT-FS will continue to support its customers through its existing sales and support channels to ensure there is a smooth continuation of services and looks forward to the opportunity to explain our unique technology and products.

The largest diameter Type 3 cylinders in the world!
